SUMMARY

Computer Science student and software developer with experience in full-stack development, mobile development, and project management. Proficient in React.js, Next.js, Flutter, and various backend technologies. Passionate about building software that optimizes real-world systems and improves human experience.

EDUCATION

University of Central Florida, B.S. Computer Science – Expected 2026

Eastern Florida State College, A.A. – 2022

Eau Gallie High School, High School Diploma – 2021

PROJECTS

Project Manager / Backend & Mobile Developer | ScholarKnights   Orlando, FL | Jan 2024 – Apr 2024

- Led development of a full-stack academic study session platform for UCF students using React.js, Node.js, and MongoDB.

- Designed Gantt charts and diagrams to organize team tasks and clarify project scope.

- Built secure REST APIs and implemented backend logic to manage courses, users, and study groups.

- Developed a Flutter mobile version of the platform, integrating with backend APIs.

Project Manager / Backend Developer | Contact Cloud   Orlando, FL | Sep 2023 – Dec 2023

- Managed development of a LAMP-stack contact management application.

- Created backend PHP APIs and managed MySQL database for storing and editing contact information.

- Designed and coordinated Gantt charts and sprint planning for 4-person dev team.

EXPERIENCE

Shift Lead | BurgerFi   Orlando, FL | Oct 2023 – Nov 2024

- • Directed team operations during high-traffic shifts, ensuring service efficiency and customer satisfaction.

- • Trained staff, optimized POS and inventory usage, and implemented process improvements.

- • Applied logical reasoning and real-time problem solving to streamline fast-paced environments.

Percussion Instructor | Eau Gallie High School   Melbourne, FL | May 2021 – Dec 2021

- • Taught percussion techniques, maintained equipment, and created lesson plans.

- • Led students in achieving performance goals for concerts and competitions.

Customer Service Representative | Domino's Pizza   Melbourne, FL | Mar 2020 – Feb 2020

- • Managed phone, online, and in-person orders while resolving technical issues.

- • Used POS systems and trained new hires to optimize order processing and in-store workflow.
